

Make Any Wall an Interactive Sports Arena

Product Overview
© October 2019, FWB GmbH

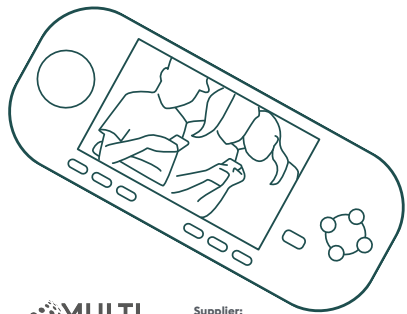

Sports Fun for the Digital Age

Using technology and gamification, we merge all forms of ball sports with computer gaming. In a time where it gets harder and harder for kids and adults to start and keep up with sports, we provide a highly engaging and attractive experience to make you move.

If you're looking for a way to get your kids and yourself away from that tablet and back onto the court, we've got you covered!

**Just like a computer game,
but with real sports!**

Any Ball
Any Wall
Anytime

Fun with every ball!

The MultiBALL hard- and software was created for real sports and professional athletic competitions. That's why our ball detection is highly reliable and very precise in detecting every ball in real time. This way we can keep your motivation up even on the most challenging situations and levels.

Any object that's larger than 5cm, it can be used to play, even stuffed toys work.

How It Works

MultiBall enables you to enjoy sports fun, intuitive and without the need for any explanation or supervision.

Simply touch the wall to reach the menu and pick your favourite game or training module.

The first ball on the wall starts the application.

Simply touch the wall
and get started!

Make Use of the Ice Cream Truck Effect

MultiBall is not just a new form of sports in the digital age, it's a highly engaging attraction that can be commercialised in multiple ways. From pay-for-play to generating footfall in clubs academies, retail or community centers, MutliBall makes sure everybody wants to get in line to play. Our aim is to provide a high quality, reliable basis for growing existing and generating new revenues for operators. Please reach out if you wish to calculate the ROI of our hardware based on your model.

The MultiBall

Turning white walls into interactive sports court.

MultiBall can be installed easily by attaching the sensor frame and the console to a wall. The console can be mounted on top, on the sides or below the sensor frame depending on the location.

Built in Germany with the highest standard, we designed our hardware for maximum durability and full **24/7 usage**. All parts used are industry grade components and the 3mm stainless steel frame can even withstand impacts of a baseball bat.

The Projector

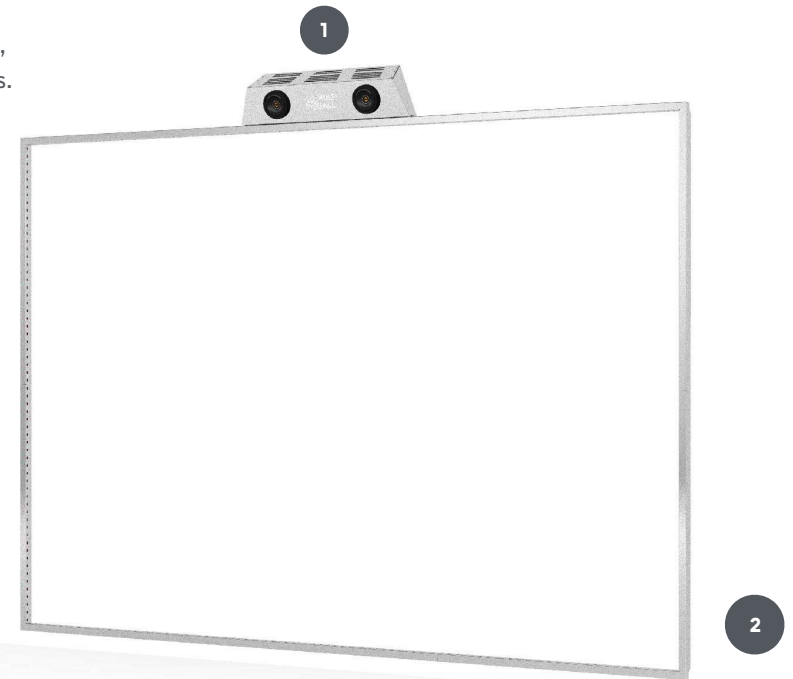

MultiBall requires a projector connected via HDMI cable. We offer projector packages but you can also use your existing projector or buy one separately.

Internet Connection

MultiBall connects to the internet and receives updates and new games automatically. Connect the console via a standard network cable (RJ45) or a phone hotspot via USB.

1: Console

holds all processing units, sensors and loudspeakers.

2: Sensor Frame

Stainless Steel Frame: 5 x 5 cm

What you need to set up MultiBall (not supplied)

-  Screws have to be chosen according to wall structure.
-  Tools: Allen key, impact driver, water level
-  Any wall that is strong enough to be hit by a sports ball.

The MultiBall LED

Yes, it's time to play outdoors!

The LED version of MultiBall consists of a 4,5 by 3 meter stand alone LED screen and a stainless steel frame holding the MultiBall sensor system (outdoor version available). Due to massive increase in brightness, MultiBall LED can now also be used in much brighter environments or outdoors with an automatic adjustment of brightness levels. The screen is designed to withstand any impact, even by a cricket ball. It comes completely event-ready including a holding structure, flight cases and the whole setup can be easily be built within 3 hours.
